

**WALTCO**

# WALTCO SOLAR CHARGER

**NO MORE BREAKDOWNS DUE TO BATTERY PROBLEMS**

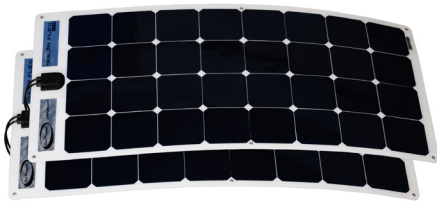

# STAY CHARGED

Research shows that 60% of road calls in the U.S. are related to power failures. The WALTCO Solar Charger resolves this problem by generating power through solar panels on the roof of your truck or trailer and storing it in your liftgate battery.

- Environmentally friendly, low impact solution
- Cost effective compared to Trail Chargers
- Low cost, payback on investment under 3-years
- Batteries charged to capacity daily
- Charging continues, even when vehicle is stationary
- Low maintenance, only requires annual inspection

### Solar panels

The lightweight solar panels are simple, modular, and easy to install. They can be configured to fit all kinds of trucks without affecting unit overall height.

### Solar controller

With a controller to prevent overcharging, your battery lasts up to 50% longer and the only maintenance it needs is an annual inspection.

# WHY CHOOSE SOLAR POWER?

The sun's power is unlimited, making it our most reliable energy source. It's clean, cost-effective and infinitely renewable. More importantly, with solar power your liftgate battery never dies, it keeps charging even when your vehicle is stationary, and never overcharges. All this means you can put an end to stops caused by power problems and maximize the uptime of your fleet.

Issue	Without Solar	With Solar
Liftgate failure due to power problems	Service call 500 – 700 dollars Truck reload 2 – 4 hours	No power failure
Vehicle idling to produce power	Fuel costs 25 – 100 dollars/day	Zero fuel costs
Battery replacement	6 – 18 months	3 – 5 years
Liftgate cycles/day	10 – 30 cycles depending on drive time	Average additional 25 cycles per day regardless of drive time

\*Based on a 200W system in Great Lakes Region

- 5 years warranty
